SUMMARY

Aspiring Software Engineer with hands-on experience in Artificial Intelligence, Machine Learning and .NET application development. Previously worked as an AI Developer Intern at Viswam.AI fine-tuning AI models and building Telugu Large Language Models (LLMs). Currently working on C#, WCF Services, Web APIs and SQL Server with exposure to debugging and production support. Strong foundation in Python, .NET technologies and cloud platforms (AWS) with a proven ability to develop and optimize scalable applications.

PROFESSIONAL EXPERIENCE

AI Developer Intern–Viswam.AI (Summer of AI, IIIT Hyderabad) August 2025 - September 2025

- Worked on AI model development using Python, contributed to building and fine-tuning Large Language Models (LLMs) and collected and prepared multimodal corpus data (audio, video and images) for model training and optimization

Database Management Intern , RINL Visakhapatnam May 2025 - June 2025

- Worked on Oracle Database Administration (DBA) tasks including performance monitoring, backup & recovery, secure data migration and user access management. Supported production database maintenance and optimization activities.

Projects

Sanket: Sign to Speech Translator: Developed an AI-powered sign language recognition system using WLASL and deep learning techniques, integrating MediaPipe, MobileNetV2, Multi Head Attention, and BiLSTM for gesture recognition, achieving ~87% accuracy across 32 sign classes. Implemented video preprocessing, frame normalization, augmentation, and pose-based feature extraction to improve model robustness and real-world performance. [\[Live website\]](#)

AgroVision: AI-powered Plant Disease Detection System: Built a deep learning-based plant disease classification system capable of processing over 200+ leaf images per minute. Applied image preprocessing, CNN-based classification, and augmentation techniques to improve prediction accuracy while reducing manual crop inspection time by 60%. [\[Live website\]](#)

EDUCATION

Bachelor of Technology in Compute Science, NIST UNIVERSITY Nov 2022 - April 2026

- CGPA 8.98
- Relevant Coursework: Data Structures and Algorithms, Object-Oriented Programming, Database Management Systems, Operating Systems, Software Engineering, Machine Learning.

ADDITIONAL INFORMATION

TechnicalSkills: Languages & Tools: C, Python, C#, SQL, .NET Framework, WCF Services, Web APIs, SQL Server, OpenCV, TensorFlow/Keras, Scikit-learn, NumPy/Pandas, Git, GitHub, Language Model Fine-tuning, Debugging, Production Support, Cloud Computing: AWS (S3, EC2, Bedrock).

Certifications:

- 1.Machine Learning for NLP – Amazon Web Services
- 2.AI Fundamentals – IBM SkillsBuild
- 3.Python Essentials – Cisco Network Academy

Leadership/Activities: Core Member, Electronics Hobby Club | Sep 2023 – Present

- Conducted workshops on hands-on IoT applications for juniors , Led the coordination and leadership of various club events.
